

Friday 18 January 2008

Welcome

Professor Justin Cobb

K N E E S E S S I O N

Very Early Intervention in OA: When I Do It

Chairs
Arthroscopic debridement
Opening wedge osteotomy
Closing wedge osteotomy
Arthrosurface: An early option?

John Newman & Andrew Williams
Neil Thomas
Jonathan Lavelle
Thierry Judet
Anthony Miniaci
Interaction/Debate

Unicompartmental Arthroplasty: A Big Step Forward?

Chairs
Meniscal bearing medial
Fixed bearing medial
Fixed bearing lateral
Meniscal bearing lateral
TKA is safer and better

Andrew Jackson & Andrew Shimmin
Neil Thomas
Dinesh Nathwani
John Newman
Klaus Brust
Jonathan Lavelle
Interaction/Debate

Patellofemoral Arthroplasty

Chairs
The Avon - A gold standard
The competitor from Bristol
Arthrosurfing: conservative approach?

Andrew Amis & David Murray
Christopher Ackroyd
John Newman
Anthony Miniaci
Interaction/Debate

Early OA & ACL Deficient: What is Best?

Chairs
Meniscal allograft & reconstruction
Osteotomy and reconstruction
UKA and reconstruction
Early TKA is better

John Newman & Anthony Miniaci
Andrew Williams
Fares Haddad
Chris Dodd
Johan Bellemans
Interaction/Debate

Lunch Break

Bi-Compartmental OA: What Is Best?

Chairs
Ignore the PFJ, just do a uni
Resurface both compartments
Early TKA is safer and better

Scott Banks & Christopher Ackroyd
David Murray
Norberto Confalonieri
Martyn Porter
Interaction/Debate

Tri-Compartmental OA: Which TKA Works Best?

Chairs
PCR TKA: The conservative classic
Uncemented PS works for me
Medial rotation knees work better
Clinical kinematics

Martyn Porter & Andrew Jackson
Robin Strachan
Bill Walter
Leith Stewart
Scott Banks
Interaction/Debate

N A V I G A T I O N

Navigation and Arthroplasty

Chairs
Navigation makes knees work better
No it doesn't,
Navigation makes hips work better
No it doesn't

Fares Haddad & Andrew Amis
Ajeya Adhikari
David Murray
Marcus Bankes
Sarah Muirhead-Allwood
Interaction/Debate

Interaction

The theme of the meeting is interaction. Handsets are distributed to all delegates, and can be used to vote on the developing issues. Anonymous, live polls of opinion will be broadcast on the IMAX screens allowing delegates to see where they stand in the group, i.e. progressive, performing a small procedure early on? Or conservative, avoiding an operation but undertaking a more serious procedure later on?

H I P S E S S I O N

Hip Impingement

Chairs
Early intervention works
Arthroscopic debridement is best
Open bump surgery is better

Johan Witt & Nobuhiko Sugano
Paul Beaulé
Damian Griffin
Mark Norton
Interaction/Debate

Hip Dysplasia

Chairs
Bernese osteotomy works for me
Rotational osteotomy is an alternative
Resurfacing is safer
Cup angles

Damian Griffin & Bill Walter
Johan Witt
Nobuhiko Sugano
Fares Haddad
Jonathan Jeffers
Interaction/Debate

Saturday 19 January 2008

Welcome

Professor Justin Cobb

Hip Resurfacing

Chairs
Resurfacing works well
Second time around
Uncemented works better
Functional outcomes
Arthroplasty is safer

David Murray & Paul Beaulé
Koen De Smet
Thierry Judet
Richard Villar
Andrew Shimmin
Michael Pearse
Interaction/Debate

Femoral Fixation in Hip Arthroplasty

Chairs
Cemented hips are all you need
Uncemented hips are just as good
Hybrids work for me
No they don't

Michael Pearse & Richard Villar
Graham Gie
Sarah Muirhead-Allwood
Peter Kay
Gordon Bannister
Interaction/Debate

MIS Approaches to the Hip

Chairs
Standard posterior: The gold standard
Mini posterior: Quicker and prettier
Anterior: Real MIS
Trochanteric flip: The kindest cut
Antero-lateral MIS

Martyn Porter & Richard Field
Simon Bridle
Sarah Muirhead-Allwood
Thierry Judet
Mark Norton
Nobuhiko Sugano
Interaction/Debate

Coffee Break

Everlasting Bearings for Joint Replacement

Chairs
Metal on plastics
Ceramic on ceramic
Oxinium on poly
Metal on metal

Simon Bridle & Gordon Bannister
Martyn Porter
Bill Walter
Fares Haddad
Alister Hart
Interaction/Debate

Close
